King salmon less than 28" that are harvested in the commercial drift gillnet fisheries may be retained and sold. King salmon less than 28" in length, and those of Alaska hatchery origin, will not be counted against the Alaskan allocation of the Pacific Salmon Treaty harvest. The department is discontinuing the use of species code 411 beginning in 2012 to account for small king salmon in drift gillnet fisheries and instead will rely on ADF&G port sampling programs for that purpose. For drift gillnet fisheries, only species code 410 should be used to report king salmon of all sizes. Fish and Game samplers working at the processing facilities will also identify hatchery-reared king salmon so those fish are not counted against the Alaskan share of the harvest.

The Emergency Order corresponding with this announcement is EO 1S8712.
